Education

2023 - now
Technical University of Sofia
Bachelor of Computer and Software Engineering
Sofia, Bulgaria

2022 - 2023
Katholieke Universiteit Leuven
Bachelor of Engineering Technologies
Leuven, Belgium

2021 - 2022
Technical University of Sofia
Bachelor of Industrial Engineering in English
Sofia, Bulgaria

2013 - 2021
Sofia High School of Mathematics
Mathematics and Informatics
Sofia, Bulgaria

Work Experience

July 2023 - present
Software Developer at Chaos Group, Bulgaria

- Maintaining the current integration of V-Ray for SketchUp
- Implementing new features
- Investigating and fixing issues
- Improve overall stability and maintainability
  - Infrastructural changes in the codebase
  - Improvements in the CI/CD pipelines

Sep 2022 - July 2023
C++ Software Developer at SCIA, Belgium

- Part of the Software Architecture team
- Integrated decades-old code with modern technologies to develop fully functional prototypes.
- Contributed to the team's adoption of scrum practices for project management.

July 2022 - Sep 2022

C++ Back-end Developer at PokerStars, Bulgaria

- Implementing requests from subsidiaries and customers to enhance platform functionality.
- Ensuring promotions target eligible players and prevent gambling addiction.
- Collaborating with marketing team to execute responsible gambling initiatives effectively.

June 2021 - July 2022

Full-stack Developer at VMware, Bulgaria

- Developing new features based on client requests to enhance software functionality.
- Maintaining and ensuring the quality of existing functionalities within the software.
- Collaborating with internal teams at VMware to address their software needs and support usage within the organization.

May 2019 - Sep 2019

C++ Software Developer at Codix Bulgaria

- Developing and maintaining back-end services for 9 international banks, utilizing C/C++ and SQL.
- Implementing over 100 customer requests for modifications and extensions of the software.
- Collaborating with international banking clients to ensure their software needs are met and their systems are optimized for performance and security.

Awards

Runner-up in President's awards "John Atanasov", 2019

- *The nomination for the award was due to the Headstarter project*

1st place, National Entrepreneurship Competition with the project "Headstarter", 2019

Scientific Publications

Nov 2016 - Nov 2017
An Analytical Outlook towards Digital Training Security Transformations
ICAICTSEE-2017, UNWE, Sofia, Bulgaria

DOI: 10.13140/RG.2.2.20333.28645, Project: Modelling & Forecasting of Future Cyber Challenges in Mixed Realities, Full text available at ResearchGate

Nov 2023 - Nov 2024
Matching Text from Start to Finish Against Multiple Regular Expressions
32nd National Conference with International Participation (TELECOM), Sofia, Bulgaria

DOI: 10.1109/TELECOM63374.2024.10812214, Full text available at IEEE Xplore

Personal Projects

2020 - now
Full-stack Developer, WebFrame

- Developing a C++ Library for creating web servers
- Optimizing it to reach over 30 times better time performance compared to the most popular web libraries for Python and Node.JS
- Doing it in a way that keeps the syntax similar to the syntax of Flask (Python) and Express (Node.JS)

2018 - 2020
Full-stack Developer, Headstarter

- Developing and maintaining the Headstarter web platform for connecting youth with businesses for internships and jobs.
- Supporting the platform goals of guiding students in career paths, networking, and gaining experience.
- Organizing team's workload for efficient operations and service delivery.

2016 - 2020
Full-stack Developer, TechEdu++

- Developing a learning management system (LMS) with Informatics courses for high school students.
- Creating short, engaging video lessons in multiple programming languages.
- Integrating TechEdu++ at Sofia High School of Mathematics curriculum.

2016 - 2017
Web Developer, Testrain

- Developed Testrain, a web-based platform for experimental emotional preference testing based on Silvan Tomkins' theory for measuring emotional attributes.
- Designed a user-friendly interface for quick and anonymous assessments of emotional properties.
